## TILSBERK head-up display helmet adapters

Cut out the relevant outline and place it in your helmet for a test. The white line should be aligned in the centre of the helmet.

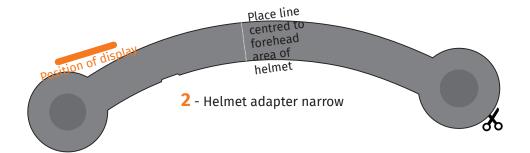

IT'S YOUR TURN

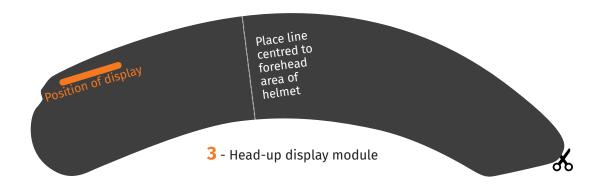

1+3
For use with installation variants A + B

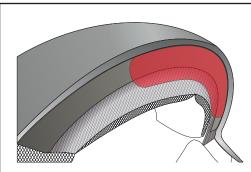

2 + 3
For use with installation variants C + D

One of the two helmet adapters (1 or 2) is mounted on the flat surface in the forehead area of the helmet. The head-up display module (3) is than attached to the helmet adapter with the integrated magnets.
